- **Data Platforms:** Oracle, SQL Server, DB2, Teradata, Databricks, Snowflake, Relational and NoSQL Databases.
- **AI-Assisted Engineering:** Copilot, Claude, ChatGPT, AI-assisted code review and refactoring, prompt engineering.
- **Engineering Practices:** System Design, Technical Leadership, Design and Code Reviews, Performance Tuning, Agile/Scrum.

PROFESSIONAL EXPERIENCE

SAS Analyst / Operations | NRG Energy, Houston, TX Dec 2020 – Present

Project: Database Marketing Operations

- Partner with cross-functional business and data teams to deliver end-to-end analyses and recurring reporting that inform strategic and operational decisions.
- Design and execute Outbound, Direct Mail, Email, and Inbound campaigns that reach millions of customers across multiple NRG brands and business segments.
- Own the full campaign lifecycle, including audience segmentation, data preparation, execution, quality validation, administration and performance measurement.
- Automate campaign execution and implement data quality, audit, and validation controls, improving accuracy, reliability, and operational efficiency.
- Develop targeting and segmentation strategies for non-commodity products, Builder programs, and Multifamily contracts.
- Analyze campaign and customer data to surface trends, engagement opportunities, and performance drivers, design customer surveys and translate results into actionable recommendations.
- Design and run A/B tests to validate hypotheses and optimize campaign performance, build reports and metrics to track effectiveness and customer response.
- Drove adoption of AI-assisted tools including Copilot across code authoring, review, documentation, and test generation to increase team velocity.

Healthcare Data Analyst | Kaiser Permanente, Portland, OR Sep 2013 – Dec 2020

Project: Actuarial Data Analytics and Claims Processing

- Led implementation of a healthcare analytics and claims processing system, from requirements gathering and configuration through development and testing.
- Oversaw claims operations, including adjudication, payment processing, and resolution, with a focus on accuracy, cycle time, and efficiency.
- Developed and maintained ETL pipelines for extracting, transforming, mapping, and loading healthcare claims, clinical, enrollment, and provider data from multiple source systems.
- Applied data privacy and governance principles, HIPAA requirements, ICD coding, CDA and other healthcare standards while securely managing, analyzing, and reporting sensitive healthcare data.
- Led cross-functional teams to identify process improvements and streamline claims workflows.
- Managed relationships with providers, insurance carriers, and third-party administrators to ensure timely, accurate claims processing.
- Supported healthcare data integration and interoperability across claims processing systems, provider databases, and enterprise data platforms.
- Conducted audits and quality assurance reviews to monitor claims performance and regulatory compliance.
- Partnered with Marketplace leaders to define business metrics and built automated workflows to monitor trends and deliver strategic recommendations.
- Presented KPIs, trends, Utilization reports and findings to senior leadership through clear quantitative visualizations.

Data and Marketing Analyst | NRG Energy, Houston, TX Sep 2010 – Aug 2013

Project: Database Marketing Campaign Management

- Served as SAS Marketing Campaign Analyst, collaborating with CRM strategists, segmentation analysts, customer operations, and data teams to plan, execute, and monitor marketing initiatives.
- Built, executed, and administered Outbound, Direct Mail, Email, and Inbound campaigns within Enterprise Data applications; automated execution and developed audit checks.
- Delivered campaign insights that connected research findings to business objectives and supported Residential and small business segments.

SAS Business Intelligence Analyst | Bank of America, Plano, TX Aug 2009 – Jul 2010

Project: Database Marketing Center of Excellence

- Translated business requirements into technical specifications and led development and implementation of analytic solutions.
- Coordinated with database and data production teams to define timelines and deliver data for analytic projects, including ETL of custom and syndicated data.
- Developed reusable SAS macros for validation, auditing, file checking, permission authorization, FTP transfer, and notifications.
- Built SAS-based production applications interfacing with SQL Server, Oracle, and DB2, and supported UNIX-based applications by resolving root causes of data issues and implementing automated tests to prevent recurrence.

Business / Reporting Analyst | Nike Inc, Portland, OR Mar 2008 – Jun 2009

Project: Financial Intensive Compensation

- Developed reusable enterprise-wide analytical and operational reports and supported ETL of custom and syndicated data for reporting.
- Partnered with financial experts to provide performance reporting and ad hoc analysis, including Sales Rep, Manager, and Seasonal Rep performance.

SAS Programmer / Reporting Analyst | Best Buy, Minneapolis, MN Sep 2006 – Mar 2008

Project: Revenue Assurance, Statistical Modeling & Reporting

- Worked with business leads to build controls ensuring Best Buy captured appropriate revenue on every sale.
- Delivered financial and revenue analysis across corporate databases, including risk analysis by location, region, division, business unit, and line of business to inform capital allocation.
- Developed customer analytics reports covering retention, cross-sell/up-sell, segmentation, loyalty, behavior stage, and forecasting.
- Provided data consulting and development services, including reporting and data extraction for Customer Attribute Models (CAM) and retention, cross-sell/up-sell, segmentation, loyalty, and forecasting studies.
- Programmed SAS statistical analyses, including linear regression, time series, analysis of variance, and confidence intervals.
- Documented data lineage from source systems to data warehouse input files.

SAS Programmer Analyst | GSK Analytics Nov 2003 – Dec 2005

Project: Clinical Trials

- Participated in daily team meetings, identified obstacles, and stayed current with industry trends and methodologies.
- Processed case report forms (CRFs), resolved data entry issues and queries, performed data validation, and loaded laboratory data.
- Identified and documented detailed data lineage for required elements from source systems to data warehouse input files.
- Implemented data linkage and data quality controls to identify duplicate records, resolve inconsistencies, reconcile datasets, and improve the reliability of healthcare reporting.

EDUCATION

Bachelor’s in Electrical and Electronics Engineering | Bangalore University, India
